1. 4.3.1 Release

1.1. Release Details

Navigator build: 4.3.053.0

Date: 28th February 2014

1.2. Summary of Changes

Template built against the 4.3.52.0 platform build to support ArcGIS 10.2.1. This release also includes the bug fixes listed below.

1.3. Bug Fixes and Enhancements

1.3.1. Issues Fixed

Issue #	Description
41356	When editing settings for a Navigator site, if bookmarks are the only thing changed, the Save button is not activated.
37187	ES125986: When editing the provisioning for a Navigator application some of the settings are not restored and have to be re-entered each time. This applies to locking the map extent; navigation show UPRN results and the order of selected layouts for printing.
35855	ES124697: Gazetteer searches do not support locators which return an envelope rather than a point location. When an extent is returned the application should zoom to this extent.
35152	ES124755: The attribute field alias in the identify tool is not pulled through into the "identify results" correctly.
33123	Minor style sheet problem with extra space forcing toolbar to spill into a second row on some screen resolutions.

2. 4.3 Release

2.1. Release Details

Navigator build: 4.3.009.0

Date: 2nd December 2013

Note: The build number has been updated as the template was rebuilt against the latest platform release.

2.2. Summary of Changes

Template built against the 4.3.10.0 platform update. No specific changes to the Navigator Template.

3. 4.2.147.0

3.1. Release Details

Navigator build: 4.2.147.0

Date: 2nd July 2013

Note: The build number has been updated as the template was rebuilt against the latest platform release.

3.2. Summary of Changes

Template built against the 4.2.169.0 platform update. No specific changes to the Navigator Template.

4. 4.2 Release

4.1. Release Details

4.1.1. Full release

Navigator Build: 4.2.048.0

Date: 11th March 2013

Note: The build number was updated after the cloud only release as the template was rebuilt against the latest platform release.

4.1.2. Cloud only release

Navigator Build: 4.2.026.0

Date: 18th February 2013

4.2. Bug Fixes and Enhancements

4.2.1. Issues Fixed

This release includes all fixes and enhancements from any previous cloud only releases, as well as those listed below:

Issue #	Description
33274	Printing: Address search pin does not show on print.
34300	Feature layer identify: When identify is performed with feature layers the visibility of the feature layer is not honoured, so it will identify all layers regardless of their visibility.
34484	Identify does not show ArcGIS Online field aliases.

5. 4.1.153.0

5.1. Release Details

Navigator Build: 4.1.153.0
Date: 5th December 2012

5.2. Summary of Changes

Compatible with ArcGIS 10.1.

5.3. Bug Fixes and Enhancements

5.3.1. Issues Fixed

This release includes all fixes and enhancements from any previous cloud only releases, as well as those listed below:

Issue #	Description
33262	Identify: Missing height parameter when using the identify function. Scale dependant layers will sometimes not return results as identify uses the height and width to work out the current scale.
32953	Identify: If by default a layer was set to be off in a map service then it would not show up in the identify results; even when the user turned the layer on and it was visible on the map. This was a bug in ArcGIS Server. This bug has been fixed by Esri at ArcGIS Server 10 SP5. It is therefore necessary to upgrade to SP5.

6. 4.1 Release

6.1. Release Details

Navigator Build: 4.1.060.0
Date: 3rd October 2012

6.2. Bug Fixes and Enhancements

6.2.1. Enhancements

Case #	Description
30788	Added ability to configure gazetteer callout box title.

6.2.2. Issues Fixed

Issue #	Description
31135	Selection dates show as numbers.

7. Known Issues

7.1. Known Issues and Workarounds

Issue #	Description
44539	Legends for ArcGIS Online feature services are not displaying when there are multiple symbols per layer.
40329	ES128528: Error responses from ArcGIS Server are cached, so that even when the error is resolved the user may continue to see the cached error message. The workaround is to clear the LocalView Fusion cache.
36561	Printing: Gazetteer marker pin obscured in printing when dynamic layers with solid fills displayed on map.
35741	Printing: Printing does not adhere to the scale thresholds and may print content that should be hidden.
32043 & 36002	ES122358/ES125434: long lists (20 items) of bookmarks are not displayed properly in IE8 and IE9. A scrollbar is displayed but it does not function correctly. The only way to move through the list is to using the down key on the keyboard.
31737	Navigator does not display "bing" copyright icon in IE8 and FireFox. Copyright has to be typed in manually.
25973	ES125564: The 'centre map' button in the middle of the navigation buttons on the navigation control doesn't work. If you click it, the map does not get reset to its default location.
31841/9 710	Text labels - May overwrite distance/measurement text on some shapes. If using both annotations it may be best to add the measurement to the label instead or add a point to label.
12060	Selecting multiple graphics - when graphics overlap, more than one graphic may appear to be selected (highlighted in yellow). The reported details (in the popup window) refer to a single selected graphic and use this graphic in subsequent queries. Check that you actually have the intended graphic selected.
31841/8 909	Tolerance on selecting graphics - particularly polyline graphics. When trying to select a polygon graphic by clicking inside it, sometimes the graphic selected is a (nearby) polyline graphic instead. Similarly when trying to select the buffer polygon around a polyline graphic it sometimes selects the polyline in preference to the polygon. Click again to select the correct graphic.

8. Help and Contact Information

8.1. Documentation

For instructions on how to install and configure LocalView Fusion, please see the LocalView Fusion Installation Guide.

For the latest LocalView Fusion news, please see the blog:
<http://geoxchange.esriuk.com/localviewfusion-blog>

For instructions on site provisioning, content publishing and administration of LocalView Fusion, please see the user help within the provisioning system.

8.2. Contact

Esri UK provides extensive on-going support services to its customers. This service covers:

- Local support of Esri products
- Support of Esri UK products
- Support of bespoke applications developed by Esri UK

Support calls can be logged with Esri UK by contacting the Helpdesk:

Telephone: 01296 745555

Email: support@esriuk.com

The support service is available 9.00 am to 5.30 pm Monday to Friday, excluding English Public Holidays.

Support will require the specific build number of the LocalView version in order to diagnose a problem. To retrieve the LocalView build number go to Support page of the provisioning website, click on the About tab.
