1. 4.3.1 Release

1.1. Release Details

MyLocation Build: 4.3.010.0

Date: 28th February 2014

Note: The build number has been updated as the template was rebuilt against the latest platform release, compatible with ArcGIS Server 10.2.1.

1.2. Summary of Changes

Template built against the 4.3.52.0 platform update to support ArcGIS 10.2.1.

2. 4.3 Release

2.1. Release Details

MyLocation Build: 4.3.004.0
Date: 2nd December 2013

2.2. Summary of Changes

Compatible with ArcGIS Server 10.2. This release also includes the bug fix listed below.

2.3. Bug Fixes and Enhancements

2.3.1. Issues Fixed

Issue #	Description
38850	ES127403/ES127509: Map marker properties pointing to incorrect endpoint.

3. 4.2.221.0

3.1. Release Details

MyLocation Build: 4.2.221.0
Date: 2nd July 2013

3.2. Summary of Changes

An option has been added in provisioning not to return the geometry on feeds. This allows feeds to run faster if you do not require the map coordinates returned.

3.3. Bug Fixes and Enhancements

3.3.1. Issues Fixed

Issue #	Description
33263	Option not to return geometry on feeds. Feeds can now just be listed without returning map coordinates.

4. 4.2.212.0

4.1. Release Details

MyLocation Build: 4.2.212.0
Date: 15th May 2013

4.1.1. Issues Fixed

This release includes all fixes and enhancements from previous cloud only releases, as well as those listed below:

Issue #	Description
30193	If the feed was not set to show on the map, an error occurred when closing the feed.
34347	When editing a page link, options were displayed that were not applicable to page links. These have now been removed.
37369	MyLocation template fails when accessed via a reverse proxy.
30194 ES125942	When you set a feed to not show on the map it works fine; but if you then open and close the feed, it shows on the map (Support Reference Number = ES125942).

5. 4.2 Release

5.1. Release Details

5.1.1. Full release

MyLocation Build: 4.2.007.0

Date: 11th March 2013

Note: The build number was updated after the cloud only release as the template was rebuilt against the latest platform release.

5.1.2. Cloud only release

MyLocation Build: 4.2.005.0

Date: 18th February 2013

5.1.3. Issues Fixed

This release includes all fixes and enhancements from previous cloud only releases, as well as those listed below:

Issue #	Description
34919	Feeds map markers do not display when performing a second address search due to caching issue.

6. 4.1.229.0

6.1. Release Details

MyLocation Build: 4.1.229.0
Date: 6th December 2012

6.1.1. Issues Fixed

This release includes all fixes and enhancements from previous cloud only releases, as well as those listed below:

Issue #	Description
33377	Issues with reverse proxy.
33270	Feeds not working in some content panels.
33152	Editing a feed sometimes loses the point symbology (IE7 and Firefox).
33135	Feed symbology issues in IE7.
33062	Custom theme text doesn't show correctly in the provisioning colour picker until you click on it.
33022	Address banner doesn't scale in two column mode.
32628	The custom theme default background colour is not set when editing an existing site.

7. 4.1.122.0 (Cloud Only)

7.1. Release Details

MyLocation Build: 4.1.122.0

Date: 20th November 2012

7.1.1. Issues Fixed/Enhancements

Issue #	Description
32489	Enable table links to work with GMS.
32742	Ability to set symbology for feeds.
32750	Addition of a show title option on topics.
30808	Custom theme problem when background is not set.

8. 4.0.180.0

8.1. Release Details

MyLocation Build: 4.0.180.0

Date: July 2012

8.2. What is MyLocation

MyLocation is a LocalView Fusion template which provides geographical information to website visitors around their selected property or location. End users can view a single page report of all services and facilities at a specified address or location.

8.3. Features

MyLocation can be configured in a variety of ways to provide information on specific areas, such as local amenities. Generally the information provided will be focused around a particular subject so that it fits thematically within a relevant page on a website, rather than providing all possible data layers in one instance of the application.

The MyLocation template is:

- Embeddable within your website.
- Configurable and can function as a standalone page or fit into an existing page's content.
- Can detect if the user is on a mobile device and display the page in a suitable format for mobiles.

8.4. Browser support

MyLocation is compatible with Internet Explorer versions 7 to 9, Chrome and Firefox.

8.5. Mobile support

MyLocation is not yet formally tested on mobile devices.

8.6. Accessibility

While the MyLocation template has been developed with accessibility as a primary design principle, Esri UK have not yet completed the WCAG 2.0 certification process with this version.

Future releases of MyLocation will be certified to 'AA' level of the WCAG 2.0 guidelines.

9. Known Issues

9.1. Known issues and workarounds

Issue #	Description
39756	MyLocation duplicates location related content and linked content if you search again. If you do Ctrl-F5 or start a completely new search it is fine.
38878	ES127334: Mobile site breaks if there is no map. If you configure a site without a map, go to the mobile version and search for an address, it shows you a blank map page. If there is no map, it should link to a different page.
38851	ES127403: The banner is displayed incorrectly after running a second address search. It either goes blank or repeats the banner image.
35200	When you have a feed that is a multipoint, the geometry won't get added to the map and the image to the left will be incorrect.
30088	In IE7 the feed results do not show symbology in the list.
30082	Feeds not working if nearby search distance is 1000m. Lowering the search distance works fine.
31807	\$\$Shape\$\$ field not filtered out on a tabular data item.
33136	Provisioning layout issues in IE7.

10. Help and Contact Information

10.1. Documentation

For instructions on how to install and configure LocalView Fusion, please see the LocalView Fusion Installation Guide.

For the latest LocalView Fusion news, please see the blog:
<http://geoxchange.esriuk.com/localviewfusion-blog>

For instructions on site provisioning, content publishing and administration of LocalView Fusion, please see the user help within the provisioning system.

10.2. Contact

Esri UK provides extensive on-going support services to its customers. This service covers:

- Local support of Esri products
- Support of Esri UK products
- Support of bespoke applications developed by Esri UK

Support calls can be logged with Esri UK by contacting the Helpdesk:

Telephone: 01296 745555

Email: support@esriuk.com

The support service is available 9.00 am to 5.30 pm Monday to Friday, excluding English Public Holidays.

Support will require the specific build number of the LocalView version in order to diagnose a problem. To retrieve the LocalView build number go to Support page of the provisioning website, click on the About tab.
