1. 4.3.075.0 Template Build

1.1. Release Details

Web PublisherBuild: 4.3.075.0

Date: 28th July 2014

1.2. Summary of Changes

A bug has been fixed which stopped feeds updating when the location was set through the show current location functionality.

1.3. Bug Fixes

1.3.1. Issues Fixed

Issue #	Description
47855	CAS-03022/ES125685 - Show current location does not work with feeds.

2. 4.3.1 Release

2.1. Release Details

Web PublisherBuild: 4.3.053.0

Date: 28th February 2014

2.2. Summary of Changes

Template was built against the 4.3.52.0 platform update to support ArcGIS 10.2.1.

Note: The 4.3.57.0 platform release fixes a bug in Web Publisher which stopped browser printing working. See the LocalView Fusion platform release notes.

3. 4.3 Release

3.1. Release Details

Web PublisherBuild: 4.3.009.0

Date: 2nd December 2013

3.2. Summary of Changes

Template built against the 4.3.10.0 platform update to support ArcGIS 10.2. This release also includes the bug fix listed below.

3.3. Bug Fixes and Enhancements

3.3.1. Issues Fixed

Issue #	Description
33532	Reverse geocode fails when the show UPRN option is switched on.

4. 4.2.147.0 Release

4.1. Release Details

Web PublisherBuild: 4.2.147.0

Date: 2nd July 2013

4.2. Summary of Changes

An option has been added in provisioning not to return the geometry on feeds. This allows feeds to run faster if you do not require the results displayed on the map.

Also when identifying an item via URL parameters the map will now zoom if passed in with a scale.

4.3. Bug Fixes and Enhancements

4.3.1. Issues Fixed

Issue #	Description
33263	Option not to return geometry on feeds. Feeds can now just be listed without displaying the results on the map.
33169	ES12323 - IdentifyItem can now be specified with scale when using a URL parameter. The map zooms in to feature at correct scale as defined in the URL. This change has been made so that Scale and IdentifyItem can be used together.

5. 4.2 Release

5.1. Release Details

5.1.1. Full release

Web PublisherBuild: 4.2.048.0

Date: 11th March 2013

Note: The build number was updated after the cloud only release as the template was rebuilt against the latest platform release.

5.1.2. Cloud only release

Web PublisherBuild: 4.2.026.0

Date: 18th February 2013

5.2. Bug Fixes and Enhancements

5.2.1. Issues Fixed

This release includes all fixes and enhancements from previous cloud only releases, as well as those listed below:

Issue #	Description
34975	ES124722: Dynamic maps do not work as base maps.
34484	Identify does not show ArcGIS Online field aliases.
34300	Feature layer Identify: When identify is performed with feature layers the visibility of the feature layer is not honoured, so it will identify all layers regardless of their visibility.
34161	External links parameter code not linking to location.
33274	Printing: Address search pin does not show on print.

6. 4.1.153.0

6.1. Release Details

Web PublisherBuild: 4.1.153.0
Date: 5th December 2012

6.2. Summary of Changes

Compatible with ArcGIS 10.1.

6.3. Bug Fixes and Enhancements

6.3.1. Issues Fixed

This release includes all fixes and enhancements from previous cloud only releases, as well as those listed below:

Issue #	Description
33262	Missing height parameter when using the Identify function. Scale dependant layers will sometimes not return results as Identify uses the height and width to work out the current scale.
33402	Identify selecting features which are not visible when zoomed out. If you have scale dependant symbology and you zoom out so that features are not displayed (yet they are ticked to be visible) - Identify displays their attributes.

7. 4.1.110.0 (Cloud Only)

7.1. Release Details

Web PublisherBuild: 4.1.110.0

Date: 20th November 2012

7.1.1. Issues Fixed/Enhancements

Issue #	Description
32465	In some circumstances, the identify tool returned an error message when used against map services running on ArcGIS Server 10.02.

8. 4.1 Release

8.1. Release Details

Web PublisherBuild 4.1.060.0
Date: 3rd October 2012

8.2. Summary of Changes

A new URL parameter to zoom to a specific feature in a layer has been added to the Web Publisher template.

8.3. Bug Fixes and Enhancements

8.3.1. Enhancements

Case #	Description
30694	Added ability to pass in an identifier to an application to zoom to a feature via a URL parameter.
31416	Enable Web Publisher to zoom to envelope extents of LocatorHub results.

8.3.2. Issues Fixed

Issue #	Description
28532	Links to external sites do not work in Web Publisher template.
29430	Customised gazetteer text is out of line.
29761	When using the identify function, callout does not warn the user when no results are found.

9. Known Issues

9.1. Known Issues and Workarounds

Issue #	Description
45977	Browser printing does not honour ArcGIS online visibility settings.
44539	Legends for ArcGIS Online feature services are not displaying when there are multiple symbols per layer.
44485	Changing the map layer visibility can cause image services to toggle on and off.
44360	Base map switcher does not work if an image service is the default.
44352	Image service base map not included in prints.
43569	ES131356/ES132055: Using a slash "/" symbol in a gazetteer display name breaks a Web Publisher site.
41165	ES128998: The legend is not arranged/lined-up properly when there are group layers with added label text.
36748	ES125685: Adding a point through the Geo-location API doesn't update feed location.
36561	Printing: Gazetteer marker pin obscured in printing when dynamic layers with solid fills displayed on map.
33178	ES123289: Error with URLs containing ampersands. The zoom doesn't work when the field value has an ampersand in it. The work around is to encode the "&" in the URL using %26.
26463	Web Publisher hangs when trying to display complex ArcGIS Online feature services.
31841/8512	<p>RSS Feeds may stop working if you change layers in the map document (MXD) used in the map service</p> <p>If layers in a map service are changed (i.e. adding a new layer or changing layer names) then feeds will need to be updated, as they rely on layer order. Depending on the cache settings it may take a little while for the fault to be detected.</p>

10. Help and Contact Information

10.1. Documentation

For instructions on how to install and configure LocalView Fusion, please see the LocalView Fusion Installation Guide.

For the latest LocalView Fusion news, please see the blog:
<http://geoxchange.esriuk.com/localviewfusion-blog>

For instructions on site provisioning, content publishing and administration of LocalView Fusion, please see the user help within the provisioning system.

10.2. Contact

Esri UK provides extensive on-going support services to its customers. This service covers:

- Local support of Esri products
- Support of Esri UK products
- Support of bespoke applications developed by Esri UK

Support calls can be logged with Esri UK by contacting the Helpdesk:

Telephone: 01296 745555

Email: support@esriuk.com

The support service is available 9.00 am to 5.30 pm Monday to Friday, excluding English Public Holidays.

Support will require the specific build number of the LocalView version in order to diagnose a problem. To retrieve the LocalView build number go to Support page of the provisioning website, click on the About tab.
